

## **MODULE B – AREA OF REVIEW AND CORRECTIVE ACTION PLAN**

### **GSDT TAB: BOUNDARY CONDITIONS**

#### **Boundary Conditions Descriptions**

A detailed discussion on the permeability inputs into the model are contained in “Section 3.7 – Boundary Conditions” of the “*Area of Review and Corrective Action Plan*” technical report. The boundaries are set in the dynamic model.

Please Note: The “*Area of Review and Corrective Action Plan*” technical report and associated figures, tables, and appendices, has been submitted as Confidential Business Information (CBI). This document has been submitted to meet the requirements of the “Boundary Conditions” tab in Module B of the Geologic Sequestration Data Tool (GSDT).
